

ion exchange

1. In surface chemistry, if the *adsorption* of one or several ionic species is accompanied by the simultaneous *desorption* (displacement) of an equivalent amount of one or more other ionic species, this process is called ion exchange.

1972, 31, 585

2. The process of exchanging ions between a solution and an *ion exchanger*.

1993, 65, 854
