

INSTRUCTIONS TO SUBMIT EVALUATION SAMPLE FOR ACCUPYC DENSITY DETERMINATIONS

Requirements:

Samples are required to have at least 0.1 cc of true sample volume. The maximum size must fit inside of a cylinder 46 mm wide and 61 mm tall. For foam density, supply enough material to cut two one inch cubes and give the density of the solid, unexpanded resin used to make the foam. Only non-hazardous materials can be submitted for evaluation.

Clearly identify each sample, along with your sample tracking ID. This form will be noted in the results data. For instrument evaluations we limit the number of samples to three (3), with a maximum of five (5) runs per sample.
